

FOR IMMEDIATE RELEASE

**ULTRA-LOW POWER, HIGH TEMPERATURE OSCILLATOR
FOR HARSH ENVIRONMENT APPLICATIONS**

ORANGE, Ca., September 24, 2020 – Statek Corporation is pleased to announce the release of a new miniature, ultra-low power, high temperature oscillator, CXOLHT.

Housed in a 3.2 x 1.5mm, hermetically sealed, non-magnetic ceramic package this oscillator is capable of withstanding high vibrational environments and survives cumulative shocks at temperatures ranging between -55°C to +200°C.

Please see the CXOLHT data sheet [here](#) to get further information.
