

FOR IMMEDIATE RELEASE

**HIGH FREQUENCY OSCILLATOR FOR
ADVANCED NETWORKING APPLICATIONS FEATURES
ULTRA-LOW JITTER AND ULTRA-LOW PHASE NOISE**

ORANGE, Ca., May 15, 2023 – Statek Corporation’s new ETXO series oscillator is now available from 20 MHz to 125 MHz and features exceptional period jitter of 1ps RMS and phase noise of -166 dBc/Hz in a rugged, 5 x 7.5mm ceramic package.

The ETXO oscillator, using fundamental frequency without PLL artifacts, is suitable for mission critical applications that require a pure signal clock reference including advanced networking, high-speed data transmission and Ethernet communication protocol.

Please see the ETXO data sheet [HERE](#) for further information.
